

I strongly urge the FCC NOT to weaken or otherwise change New Jersey's Do Not Call law. Prior to this law taking effect, my home was subject to up to 6 unwanted intrusions every night in the form of unwanted phone solicitations (usually during the dinner hour). It got to where I was afraid to answer the phone. After signing up for New Jersey's Do Not Call list, the number of calls decreased by about 90%, and I can answer my phone without being subjected to unwanted harassment. Please don't remove this protection from my personal phone.
